FAIR USE WEEK 2018

Later this month, Harvard will participate in the fifth annual Fair Use Week (Feb 26–Mar 2). This is an opportunity for the University community to celebrate the Fair Use doctrine, which, according to the Association of Research Libraries (ARL), “facilitate[s] balance in copyright law, promoting further progress and accommodating freedom of speech and expression.” The fair use of images, text, and more in scholarly work is essential, from student dissertations to faculty publications, MOOCs, and more. Fair Use Week launched in 2014 when Kyle K. Courtney, the Office for Scholarly Communication's (OSC) Program Manager and Copyright Advisor, turned the idea suggested at a conference into a noteworthy nationwide event. It now enjoys the sponsorship of the ARL and is celebrated internationally.

We invite you to explore the Harvard-based Fair Use Week festivities and read guest posts on the OSC’s copyright blog, all of which can be accessed via the OSC’s Fair Use Week webpage: bit.ly/fairuseweek18.

DASH in 2017

In 2017, DASH, a central, open-access repository of research by members of the Harvard community, continued to open and expand access to Harvard research. Harvard authors deposited over eight thousand works in the repository. DASH saw a record-breaking 4.5+ million downloads from readers in every country on earth.

YOUR STORIES MATTER

I work for state government and do not have the resources to pay for access to research. Access to Harvard research articles provides our office with information critical to informing our recommendations on state policies. It allows us to better understand the specific topics covered in your literature, as well as build the overall body of research that provides the basis for our decision-making. Information is power, and your policy of open-access empowers all of us regardless of ability to pay; the highest mission of true teachers.

Feedback from a state employee, related to the Michael Gillenwater, Xi Lu, and Miriam Fischlein article Additionality of Wind Energy Investments in the U.S. Voluntary Green Power Market, downloaded over 1200 times from DASH.

HARVARD LIBRARY
Office for Scholarly Communication

The Office for Scholarly Communication (OSC) spearheads campus-wide initiatives to open, share, and preserve scholarship. With support from OSC, open-access policies are now in place at all Harvard University schools. OSC also runs supporting programs, such as DASH, the Copyright Advisory Program, ETDs @ Harvard, and the HOPE Fund.
